Join us for an enlightening and interactive conversation on harnessing AI tools to inspire and support youth in their educational pursuits. This session will kick off with an overview of AI, followed by a presentation of diverse AI applications designed specifically for learners. Witness live demonstrations of innovative tools and receive comprehensive answers to your AI inquiries. By the session's end, you'll leave with increased confidence in employing AI tools to enhance educational experiences.

Speaker Bio: Jennifer He, Founder of WebGlow AI, a pioneering company specializing in web design and AI education, brings over 15 years of expertise in designing and developing innovative solutions for Higher Education, Libraries, and Non-Profit Organizations. As Vice President of the New England Library Association and a member of various art and cultural boards in Massachusetts, she is dedicated to fostering advancements in technology and education within diverse communities.
